ANNUAL REPORT
OF THE
INSPECTORS
OF THE
EASTERN STATE PENITENTIARY.

FOR THE YEAR 1902.

*To the Governor, the Senate, and House of Representatives,
and the Board of State Charities of the Commonwealth
of Pennsylvania.*

THE Inspectors of the State Penitentiary for the Eastern District of Pennsylvania respectfully present their annual report for the year 1902.

During the year there has been no change in the *personnel* of the Board.

At the annual meeting of the Board held in January, 1902, William G. Huey was elected to the Presidency of the Board of Inspectors, who came to the post with no knowledge of the management of institutions of this kind, but with forty years' experience among active men

to draw upon, and with the ideas that public business should be conducted the same as private business.

We believe that all efforts should be used to keep in the minds of the employees and of our charges the respect due to a management that deals in facts.

We desire that our charges shall leave the Penitentiary in a much better moral and physical condition than when they came to us; that all rough treatment and brutal language shall cease, and that better control can be had by self-respect.

We recognize there are several classes of criminals: First, the degenerates born of parents who have been convicts or of depraved instincts; second, the lazy, educated convicts who commit crime because it is easy, the profits large, and that conviction may be escaped; third, the poor fellows who have no one to guide their footsteps from infancy, no mother's care; and, fourth, the accidental criminals, who are brought into crime by evil companions, drink, &c.

To the two last classes our sympathies go out; in no way should favoritism be tolerated in an institution of this kind.

We believe with a little patience on the part of all, a proper and careful solution of all matters will be reached.

A large institution can only be controlled by a careful, positive, and manly management; one that prevents wasteful expenditures, wrongdoings of any kind amongst Managers, employees, or prisoners; one that fosters honesty and truth. With a population of over one thousand, of all kinds and characteristics, it is no easy task.

At the session of the Legislature of 1900-1901, sundry appropriations amounting to \$35,900 were made to this

Penitentiary, the said appropriations being the first that were made for twenty-nine years previous, the last one being in 1872 for \$5600.

Appropriation for boiler house.....	\$5,000 00
A large and commodious boiler house has been erected, in which are installed five boilers, which are used in heating the entire place; heretofore the boilers were located in various portions of the buildings.	
For tunnels under corridors	3,000 00
Connections were made under the corridors with the Centre for access to all the heating and water pipes.	
For engines, dynamos, switchboards, connections, &c. ..	6,000 00
A first-class electric light plant was installed.	
For boilers and settings.....	5,000 00
New boilers of modern type were purchased and installed.	
For extra foundations for boilers and engines.....	2,000 00
Solid foundations were erected.	
For piping, fittings, pumps, &c.....	3,000 00
For repairs to drainage system.....	2,000 00
For belt line water pipe.....	1,400 00
A new line of water pipe was laid around the place.	
For water service connections	3,000 00
Connected the different blocks and the engine house with the belt line.	
For new roof to Seventh Block	1,000 00
Revision of electric lighting system	\$3,000 00
Alteration of boiler house to cells	1,500 00
	<hr/> 4,500 00
	<hr/> <u>\$35,900 00</u>

Work on the above has been completed with the exception of the last two items, which we hope to have finished within a very short time.

For the next two years we have asked appropriations for much-needed improvements; among them may be noted a storehouse, cold-storage plant, enlargement of the present cook and bake house, a new carpenter shop and blacksmith shop.

On the 5th of May, 1902, commenced on the south side to point the inside of the large wall, the pointing in many places having dropped out; pointed within 10 feet of the top, erected a scaffold 100 feet long, and had for two months 28 men on said scaffold under the charge of 2 officers, and worked until the 5th of July. During the two months no effort to take advantage or effect an escape was made. We expect during the coming summer to finish the pointing.

Appended to this report and embodying fuller details of the operations of the institution, will be found the reports of the Warden, Moral Instructor, and Physician, for which we ask a careful perusal, as they are full of valuable information.

The tables as submitted may not be rigidly accurate in every particular, because having to depend upon the prisoners' own statements for the facts presented, their well-known disposition to suppress an inquirer and endeavor to mislead him must be taken into account, but they are sufficiently correct for every practical purpose.

Respectfully submitted,

WILLIAM G. HUEY,

President.

EASTERN STATE PENITENTIARY, December 31st, 1902.

WARDEN'S REPORT.

*To the Board of Inspectors of the State Penitentiary
for the Eastern District of Pennsylvania.*

GENTLEMEN :

The Warden presents his annual report for 1902.

We commenced the year with 913 prisoners. The number received during the year was 488, those discharged during the same period numbered 392.

Of the 392 discharged, 347 were released by authority of the commutation law passed by the Legislature of 1901, 6 by order of court, 13 by death, 12 on pardon by the State, 7 by authority of Huntingdon Reformatory, 1 by expiration of time, 1 by suicide, and 5 transferred by the United States authorities to Atlanta, Ga.

At the end of the year the population was 747 white males, 12 white females, 241 colored males, and 9 colored females.

The largest daily number in confinement was 1019; the smallest, 896.

Of those received during the year, 398 were native and 90 foreign born.

Of the 488 received, 116 were committed for crimes against the person, the length of the sentences being from one year to life term. The most striking fact in this connection is that 23 of the 116 are persons of twenty-five

years of age and under, who have been convicted of murder in the second degree, the youngest being but fifteen years of age, after which they range as follows: 1 at sixteen years, 3 at seventeen years, 1 at eighteen years, 2 at twenty years, 2 at twenty-one years, 1 at twenty-two years, 3 at twenty-three years, 6 at twenty-four years, and 3 at twenty-five years.

I regard this as a remarkable and serious condition. It is the first time in my twenty-five years' connection with the Institution that such a large percentage under the age of twenty-five years has been convicted for this crime. In looking for a cause of this condition, one is soon convinced that it is brought about by the environments and training of the young. In none of the foregoing cases can the crime be attributed to the drink habit.

There were 6886 general visits during the year. This number does not include special visitors and visitors to prisoners.

The conduct of the prisoners during the year has been excellent. No force of any kind was necessary to maintain discipline.

The last Legislature made us appropriations for sundry improvements and repairs; these appropriations are the first made to this Institution for these purposes for twenty-nine years. The work on the improvements has been done by the prisoners. Our force of officers has not been sufficiently large to supervise at all times the men while at work; yet notwithstanding the apparent lack of supervision, the work progressed satisfactorily, without the loss of discipline and without the necessity of using harsh measures to maintain order. All nationalities were together, but no disturbance of any kind occurred.

During the latter part of the year an investigation was held at the Penitentiary by a Committee of the State Board of Public Charities. They have filed their report, in which they take exceptions to some of the time-honored customs followed in this Institution. Anticipating the action of the Committee, all the matters complained of have been corrected in every detail by your Board.

The National Prison Congress of the United States held their annual meeting in our city September 13th to the 17th, inclusive. The meetings were well attended, not only by those interested in prison work, but by the public at large. The members of the Pennsylvania Prison Society are entitled to the credit for the manner in which the delegates were treated. Every courtesy was shown the delegates, and all departed with the feeling that Philadelphia had not lost its reputation in knowing how to look after its guests.

In regard to the proposed legislation to make all sentences indeterminate, I cannot believe this would be productive of good results. The men clothed with power to determine when a prisoner should be discharged would have to be men of exceptional strength of character to resist and withstand the importunities of relatives and friends of the prisoner. Those who would necessarily benefit most by the indeterminate sentence would be the crime class, or men who have spent most of their lives in prison; their conduct and behavior while in prison would be so exemplary as to merit and receive its benefits, and would the oftener be turned into society without having served sentences sufficient in length for the enormity of their crimes.

This would place them on a parity with the prisoners

who had received their first sentence. This, to my mind, would be a discrimination in favor of the crime class as against the unfortunate who for the first time saw the inside of prison walls.

During the year the Penitentiary has been visited by the duly authorized official visitors, some not as frequently as heretofore. To the Rev. Herman L. Duhring, the Rev. H. Cresson McHenry, of the Philadelphia Protestant Episcopal City Mission, and the Rev. J. F. Ohl, City Missionary of the Lutheran Church, are due the thanks for supplying singers and music for the Sunday afternoon services.

Mrs. Horace Fassett and other members of the Pennsylvania Prison Society, also Mr. P. H. Spellisy and Mr. A. A. Boyle, of the Roman Catholic visitors, have been faithful in their work for the prisoners.

Miss A. M. C. Dupree, President of the Prisoners' Chapter, of the King's Daughters, accompanied by ladies of the Chapter, have visited the women during the year. They have been unremitting and faithful in their work; they have furnished special offerings of flowers, cards, and books at Christmas and Easter to the female convicts.

Mr. James McConnell, Clerk, still maintains the standard in the performance of his duties.

Mr. Charles R. Hardt, Public Accountant, has audited the accounts and books for the year 1902 and certified them as correct.

The members of the American Catholic Society for Visiting Prisoners are punctual in their visits to the inmates of their faith.

Mr. John J. Lytle, Secretary of the Pennsylvania Prison Society, is almost a daily visitor here attending to his exacting duties.

As to the religious and educational as well as the physical condition of the prisoners, would respectfully refer you to the separate reports of the Moral Instructor, Rev. Joseph Welch, and Wilmon W. Leach, M. D., Physician. Both reports show careful thought and study on the part of the principals of these departments.

I must commend the officers for their assistance and performance of their duties during the past year. They have on all occasions cheerfully obeyed all orders given, and have performed their work to the best of their ability. With the highest appreciation for the courtesy received from each member of your Honorable Board,

I remain respectfully yours,

D. W. BUSSINGER,
Warden.

EASTERN STATE PENITENTIARY, December 31st, 1902.

MEDICAL REPORT.

To the Board of Inspectors of the State Penitentiary for the Eastern District of Pennsylvania.

GENTLEMEN :

It is especially gratifying to me to be able to report to your honorable Board that the general health of the Institution for the year just ended has been excellent, notwithstanding the prevalence of two epidemics—smallpox and typhoid fever—in the community at large.

Not a single case of smallpox has occurred within our precincts. Vaccination as a preventive has been vigorously practiced, and about seven hundred of the inmates have been inoculated; the remainder having been vaccinated within the requisite period.

One case of typhoid fever made its appearance in August, which did not prove serious, and which was not attributable to any discoverable cause. Had it not been for the new and efficient sanitary system and the boiling of all drinking water furnished to the inmates, the number of cases of this disease and its complications might have been serious. There have been no other forms of epidemic disease.

The death list numbers fourteen, which is the smallest for this Institution for several years, and materially smaller than the rate of mortality for our city. Of these, one committed suicide by hanging, and of the remaining

thirteen, five were in impaired health when received at the Institution.

Tuberculosis, the foe common to all penal institutions, claimed eight of our inmates, and this in spite of all available precautions—nutritious diet, unlimited outdoor exercise, appropriate medical treatment, together with regular fumigation of the cells by formaldehyde. It may be worthy to note that in this latter particular we are certainly the equal of any similar institution in the country.

The susceptibility of the colored race to this form of disease is well demonstrated by the fact that while but one-fourth of the population of the prison is colored, the death rate of that class from consumption is nearly one-half.

It was necessary to have one major operation. For this the services of the eminent specialist, Dr. Henry R. Wharton, were secured. The case was one of intestinal obstruction, engendered by a cancerous growth, and while the outcome was not productive of prolonged life, it was satisfactory in that the State's criminal had received all that surgical skill and science could render.

Four cases of mental aberration were reported to the respective county courts, and commissions were appointed, who adjudged the several patients insane, and they were shortly thereafter removed to special asylums.

Of the improvements of the year, mention should be made of the new operating room with its needful appliances; and two yards, one for the use of the tubercular patients, the other for the non-tubercular invalids.

During the year 8741 visits have been made, an average of 28 a day, and this exclusive of night calls and hospital visitations.

The original prescriptions number 2497; renewals, 3333; but the majority of the cases being minor ills, have received treatment direct from the medicine case on my morning rounds.

The expenses incident to drugs, surgical instruments, and dressings amount to \$1011.29.

I take this opportunity to express my sincere thanks to the Warden, Principal Overseer, and the other officials of the Institution for the uniform courtesy extended to me in the discharge of my duties, as well as to you, gentlemen, for the encouragement and sympathy which you have vouchsafed me.

The Hospital report, diet lists, and number of deaths for the year are hereto appended.

Respectfully submitted,

WILMON W. LEACH,
Physician in Charge.

MORAL INSTRUCTOR'S REPORT.

To the Board of Inspectors of the Eastern State Penitentiary.

GENTLEMEN :

I respectfully report for the year A. D. 1902:—

We have great reason to be grateful to the Giver of all good for the protection vouchsafed us and the general good health of the year.

There is a very satisfactory recognition of the administration of the prison prevailing among the inmates, which conduces to the quietness and good order of the Institution and renders unruly infractions of the peace very rare among us. There is a corresponding effort with the physical obedience thus rendered, to promote good conditions of mental and moral tone by the inmates themselves, that deserves appreciation and encouragement.

In the lack of employment, every effort is needed and warranted to protect and promote not merely the physical existence, but also the development of as vigorous a stamina as is possible in the conditions of detention provided for us by the law.

While denied the opportunity of providing such systematic and steady employment as is indicated by science and good morals, the utmost that can be done by your Board will be abundantly recompensed in the improved condition of those committed to your care.

I recognize the situation, and in my intercourse with the prisoners, in the quietness and confidence of the cell, have found a frank recognition of it by them, and a disposition to appreciate in the best spirit all that is done in their behalf.

We all realize that employment that shall be steady and useful is the great need of our inmates, and under the present conditions this seems impossible to provide.

The action of the "new Commutation Law," as it is still called, is having a good effect in a sifting process that affords the really deserving ones an opportunity of returning to their places in the community, and returning the reckless or incorrigible to their proper places, to serve the entire time of their original sentence; this additional time, as they call it, seems to be more of a hardship, and severer as a discipline, than the sentence itself given by the Court for the crime.

The Pennsylvania Prison Society is doing what it can, in providing clothing for discharged prisoners and furnishing tools to workmen who need them to obtain employment; the task is too much to be thrown upon methods of private charity, and ought to be met, in part at least, by the State, or the county from which they are sent.

With all the difficulties that surround the situation, and they are many, we still have great reason for encouragement in being able to find those who will aid in putting on their feet again the unfortunate subjects of prison environments.

I desire to acknowledge the assistance received in this direction from Mrs. Maud Ballington Booth, of New York, by means of Hope Hall. The Home of Industry,

in this city, is engaged in this work, but it needs a very much larger outfit of accommodations and appliances to meet the needs of the situation.

A Home Farm, at a distance from the city, where there could be some adaptation of employment, both mechanical and agricultural, without the constant presence of opportunities and inducements to evil, might aid, and very largely meet the practical wants of many cases; the outlay for its cost would not be serious, and it is well worth the trial.

Our religious services are well sustained with the assistance of the Local Preachers' Association of this city, and ministers of the Protestant Episcopal City Mission, and the Rev. J. F. Ohl, of the Lutheran City Mission.

The music is furnished by volunteers from churches of the city in the morning service, and a choir from the various denominations, arranged for by the Rev. H. L. Duhring, D. D., Superintendent of the Protestant Episcopal City Mission, in the afternoon.

Visitors are regularly appointed by the Pennsylvania Prison Society and the American Society for visiting Catholic prisoners.

Ministers of the various religious denominations are cordially welcomed to visit members of their respective churches.

We are well supplied with religious papers by societies and individuals, which are appreciated by our people.

I desire to make special mention of the Prisoners' Guild of the King's Daughters, and the Rev. W. G. P. Brinckloe, of Eden, Bucks County, for liberal supplies of the *Parish Visitor* and of the *White Ribbon*, which

have been very faithfully sent us by them respectively for years past.

The Pennsylvania Bible Society has very generously kept us supplied with copies of the Bible in the various languages for which we have had need.

To all the friends who have thus aided in the ministry to those in bonds, I desire to present through the Board the assurance of our high appreciation and sincere thanks.

The Library is a constant source of relief and entertainment to those who can use and enjoy books; there are many here who learn this for the first time. The wear on the books is severe and the life of them short, so that we need to be constantly replenishing our stock.

The work of our School Teacher has been very much increased and rendered more perplexing in the effort to aid the growing numbers of our foreign population in learning our language; we call to our assistance others who have already learned it to some extent, and by their interpreting do the best we can with an embarrassing situation.

I present herewith the reports of the Librarian and School Teacher.

I desire to acknowledge the uniform kindness that I have received from the Board in all my relations with it.

I also take this opportunity of expressing my appreciation of the co-operation of the Warden in all his relations to my work and the constantly arising complex questions presented.

I present the following figures, gathered in careful interviews with the inmates :—
